

YOUR PARTNER FOR ELECTRIC ACTUATORS

# WE MOTORIZE YOUR VALVES ON SITE

## MOTORIZATION OF VALVES

We are specialists in electric actuators and can help you with qualified technical advice in planning, technical support, installation and commissioning as well as service, maintenance and training.

Our service organization is well developed with several service centers across Scandinavia and our technicians are available locally. Motorization of your valves can be done on site, as it is both cost effective and time efficient.

The actuators are delivered directly to you and our local service technician will assist you with the motorization of your valves. Since you are a contract customer, you will receive a discount on the service hours according to your agreement.

## HOW IT WORKS

- 1 Ordering actuators**  
Our sales & application engineers make a quote based on your needs and demands. When the offer is accepted, the order will be placed.
- 2 Delivery of actuators**  
The actuators are delivered to your site.
- 3 Motorization of your valves**  
Our local service technician assists you with the motorization of your valves on site.
- 4 Done!**  
The motorized valves are ready for delivery and you have saved costs on transport and valuable time for your customers.
